EDUCATION

JSPM's Rajarshi Shahu College Of Engineering
Bachelor of Technology in Electronics and Telecommunications

Pune
Aug. 2023 – May 2027

EXPERIENCE

President – Code Crafters ENTC Club
JSPM's Rajarshi Shahu College Of Engineering

2025 – Present
Pune, India

- Led a team of 20+ members to organize technical workshops and coding events for 100+ students
- Conducted hands-on sessions on programming, electronics, and IoT fundamentals
- Managed end-to-end event execution including planning, coordination, and technical setup
- Initiated practical learning culture by encouraging project-based development among students

PROJECTS

Advanced Driver Assistance System (ADAS) | ESP32/Raspberry Pi, Sensors, OpenCV

Ongoing

- Developing an ADAS prototype for real-time obstacle detection and collision avoidance
- Integrated ultrasonic sensors and camera module for environment perception
- Implemented object detection using OpenCV for dynamic obstacle tracking
- Designed system focused on automotive safety and real-time response

Vehicle Telemetry System with CAN Bus Simulation | ESP32, CAN, MQTT

- Simulated vehicle parameters such as speed, braking, and engine data using CAN communication
- Transmitted real-time telemetry data to cloud using MQTT protocol
- Developed dashboard for live monitoring of vehicle performance
- Aligned system design with automotive embedded communication standards

Industrial IoT Predictive Maintenance System | ESP32, MQTT, ThingSpeak/AWS IoT

- Built an IoT system to monitor machine health using vibration and temperature sensors
- Implemented MQTT protocol for real-time data transmission
- Developed cloud dashboard to visualize anomalies and predict failures
- Enabled early fault detection to reduce downtime in industrial systems

Real-time IoT Dashboard Web Application | React.js, Node.js, REST API

- Developed a web dashboard to visualize real-time sensor data from IoT devices
- Integrated REST APIs to fetch and display live data with dynamic updates
- Designed interactive UI for monitoring system performance and alerts
- Optimized frontend for efficient rendering of real-time data streams

TECHNICAL SKILLS

Embedded Systems: Arduino, ESP32, Raspberry Pi, Microcontroller Programming, GPIO, PWM, ADC

Languages: C, C++, Python, JavaScript

IoT Protocols & Communication: MQTT, HTTP/REST, UART, I2C, SPI, CAN Bus (Basics)

Cloud & IoT Platforms: AWS IoT, ThingSpeak, Firebase

Tools & Technologies: Git, Docker, VS Code, Linux (Basics)

Data & Visualization: JSON, Real-time Data Processing, Dashboard Development

Web: React.js (for IoT dashboards)

Core Concepts: Sensor Interfacing, Real-time Systems, Industrial IoT, Edge Computing
