EDUCATION

JSPM's Rajarshi Shahu College Of Engineering

Bachelor of Technology in Electronics and Telecommunications

Pune

Aug. 2023 – May 2027

EXPERIENCE

President – Code Crafters ENTC Club

2025 – Present

JSPM's Rajarshi Shahu College Of Engineering

Pune, India

- Led a team of 20+ members to organize technical workshops and coding events for 100+ students
- Conducted hands-on sessions on programming, electronics, and IoT fundamentals
- Managed end-to-end event execution including planning, coordination, and technical setup
- Initiated practical learning culture by encouraging project-based development among students

PROJECTS

AI Contract & Policy Risk Intelligence Agent | *Python, FastAPI, LangChain, FAISS, MySQL, Gradio*

- Built an Agentic AI-powered document intelligence system using RAG architecture for contract and policy analysis
- Implemented semantic search with embeddings and FAISS for contextual querying and evidence retrieval
- Developed automated risk detection workflows for liabilities, compliance risks, and suspicious clauses

Infrastructure Failure Prediction System | *Python, TensorFlow, scikit-learn, FastAPI, React.js, MySQL*

- Developed an AI-driven infrastructure monitoring platform for predicting abnormal server behavior
- Implemented anomaly detection and time-series forecasting models for proactive failure prevention
- Built a real-time analytics dashboard for infrastructure health monitoring and alert generation

Workplace Communication Intelligence System | *Python, BERT, HuggingFace, FastAPI, React.js, MySQL*

- Built an NLP-based system for analyzing workplace emails, support tickets, and chat conversations
- Implemented phishing detection, sentiment analysis, toxicity detection, and escalation prediction models
- Designed AI-assisted risk scoring and communication monitoring workflows using transformer models

AI Real-Time Fitness Trainer | *Python, OpenCV, MediaPipe, TensorFlow, FastAPI, React.js*

- Developed an AI-powered fitness trainer capable of tracking exercises like squats, push-ups, and lunges in real time
- Implemented pose estimation and repetition counting using computer vision and body landmark detection
- Built personalized workout feedback and exercise recommendation workflows based on posture and performance analysis

TECHNICAL SKILLS

Languages: Python, C++, SQL

AI/ML: Machine Learning, Deep Learning, NLP, Generative AI, Agentic AI, Retrieval-Augmented Generation (RAG)

LLM Frameworks & Tools: LangChain, HuggingFace Transformers, OpenAI API, Prompt Engineering, Semantic Search

Machine Learning Libraries: TensorFlow, scikit-learn, pandas, NumPy

Computer Vision: OpenCV, MediaPipe, Pose Estimation, Real-Time Video Processing

Vector Databases & Storage: FAISS, MySQL, Embeddings, Vector Search

Core Concepts: Transformers, Embeddings, Fine-Tuning Basics, Anomaly Detection, Time-Series Forecasting, Text Classification

Tools & Platforms: FastAPI, Gradio, Git, Jupyter Notebook, VS Code, OpenTelemetry
